

Continuous Exposure Management

360°

Continuous Threat Exposure Management to Predict and Prioritize Future Threats

Today's security teams are swimming in data they can't act on. Why does this situation exist? Modern organizations rely on a broad variety of tools and vendors, each driven to make their offerings complete and comprehensive, and to reveal as much information as possible. Unfortunately, it's usually people who must consume that information output, and though one tool's output might be acceptable, our cybersecurity teams must handle the output of many tools – which conflict with each other as much as they agree.

To stay ahead of well-funded and organized adversaries is extremely complex. The job of prioritizing actions while being overloaded with new information is overwhelming cybersecurity teams. Combining this with the difficulty acquiring and retaining talent exacerbates the problem.

KEY BENEFITS OF CONTINUOUS EXPOSURE MANAGEMENT 360°

Reduce Material Risk

Sophisticated AI helps to Identify, prioritize, and eliminate exposures before adversaries can find and exploit them.

Slash Alert Fatigue

Closing security gaps reduces the day-to-day noise associated with predictable threats, creating dramatic reductions in downstream workloads.

See Immediate Value

Built on the Epiphany Intelligence Platform, with simple integrations to common IT infrastructure, you'll see results in a matter of days.

Predict and Prioritize with Continuous Exposure Management 360°

Reveald’s Continuous Exposure Management 360° (CEM360°) leverages the Reveald Epiphany Intelligence Platform (EIP) and expert analysts from the Reveald Fusion Center to provide 24/7 continuous threat exposure management. Our service is based on advanced attack graph analysis, leading to business risk reduction outcomes by ingesting and aggregating data from a variety of sources, automated security analysis, validation, reporting, and guided resolution.

Key Capabilities of Continuous Exposure Management 360°

Attack Path Analysis	The Epiphany Intelligence Platform leverages AI processes to continuously enumerate and analyze thousands of potential paths that might connect an initial exposure to a damaging breach.
Identity Risk Analysis	Understand the complex web of trust across your organization, and how it can lead to unexpected and dangerous exposures.
Intelligent Prioritization	Combining exposure data with the very latest threat and vulnerability intelligence shines a bright light on the security gaps that cybercriminals could use to compromise your digital infrastructure.
Targeted Remediation	Receive immediate guidance on the most important steps you can take today to reduce material risk to your business.
Objective Metrics	See the results of your efforts in easy-to-understand risk metrics.

D E P L O Y

Reveald’s team walks you step-by-step through deployment, integration, and training on the Epiphany platform, and establishes key metrics for the Reveald partnership.

M A N A G E

Receive ongoing reports on progress toward key business objectives, tailored expert guidance on risk minimization, and vulnerability prioritization.

O P T I M I Z E

Reveald’s analysts make sure your investment is always tuned and optimized, ensuring integrations your cybersecurity stack work flawlessly.

A Clear Path to Security Maturity

Reveald’s subscription services are crafted to guide organizations who have standardized on the CrowdStrike platform to walk a predictable, repeatable path to security maturity.

ABOUT REVEALD

Reveald guides organizations along their journey from reactive to proactive defense. Reveald’s AI-driven Epiphany Intelligence Platform™ empowers security teams to break free from existing reactive processes by leveraging Continuous Threat Exposure Management (CTEM), supported by the expertise to guide them on every step of the journey. Known for its innovative and proactive approach to cyber threats, the company is powered by a client-first approach, prioritizing risk mitigation and operational efficiency. **To learn more, visit reveald.com**
